

**THE WORLD HAS CHANGED  
NEW PROBLEMS COME WITH NEW SOLUTIONS**

HYDROALCOHOLIC GELS

For effective, economically and environmentally sustainable protection

PRIVATE AND CONFIDENTIAL

Having clean hands prevents illness and saves lives.

The World Health Organization (WHO) warns that proper hand washing is the first line of defence against the spread of many diseases.

Keeping your hands clean is more vital than ever today. This reason has led us to create the ***Kosimetik Self+Care*** cosmetic product line. This range of products allows you to keep your hands perfectly clean in any place and circumstance.

***Kosimetik Self+Care*** is not only satisfied with the effectiveness of the product, but also cares about the environment and the health of the hands. For this reason we use raw materials of natural origin, recyclable packaging, essential oils instead of perfumes, and active ingredients from organic farming.

# WHY USE HYDROALCOHOLIC GEL?

- + The product has become a necessity good; it is for daily use.
- + Washing your hands with soap and water is not always possible.
- + Hand washing or disinfection is necessary several times a day.
- + Small amount necessary (3 ml approx.).
- + Minimum 30 seconds friction needed.
- + Eliminates 99,9% of bacteria.

*Gel must have at least an alcohol concentration of 70%.*
